AMAZON SELLER CENTRAL FBA INTEGRATION PACKAGE

What's included in the standard package:

Sales Orders from SellerCentral

Despatched sales orders that Amazon have taken from stock in their distribution centres will be extracted and created in B1. This process involves the creation of a Reserve Invoice and Payment, usually into a suspense account, plus a linked despatch. This will greatly aid reconciliation when Amazon pay in bulk for the orders.

* Fulfilment by Amazon (FBA) is a service where Amazon will take care of storing, packing and shipping your products, handling customer support and returns.

Excluded from Package:

The following integration areas are possible but can be done in various ways, meaning scoping would be required with the customer. This can be done as part of a project or as a phase 2 to the package

- Payout Reconciliation
- Additional Countries

If you would like more information on the above please call:
