

EBAY INTEGRATION PACKAGE

The diagram consists of three overlapping circles arranged horizontally. The left circle contains the Sage 200 logo, the middle circle contains the MAGMA logo, and the right circle contains the eBay logo. A white line with arrowheads at both ends curves over the top and under the bottom of the circles, indicating a bidirectional flow of data between all three systems.

Sage
200

MAGMA

ebay

Connecting eBay with Sage 200 is now even easier with the latest integration package from Cindercone. The solution automates seamless data flow between your Sage 200 and eBay, keeping your marketplace up to speed in real-time.

Each package includes:

Sales Orders

Inventory

Despatches

INTEGRATE. CONNECT. FLOW

EBAY INTEGRATION PACKAGE

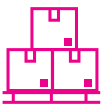

What's included in the standard package:

Sales Orders

Sales Orders from eBay

New eBay orders will be created within Sage 200 along with an attached Payment. Our implementation team will work with you to agree mapping rules around customer and product coding, end client delivery address and contact details, required delivery date, couriers, and price. This is a key integration that saves time and reduces errors, ensuring that subsequent messages are built on a solid foundation.

Inventory

Inventory to eBay

Magma will send current stock levels to the eBay platform from Sage 200. Our implementation team will agree the rules for extracting this information from Sage200. It is key that rules are agreed to hold the eBay listing ID against the product record in Sage 200.

Despatches

Despatches to eBay

Magma will return the tracking reference to the eBay platform, along with the despatch confirmation. Our implementation team will agree the rules for extracting this information from Sage 200.

Excluded from Package:

- Product Create/update
- Pricing Sync
- Additional Countries

If you would like more information on the above please call: **01628 520540** or email: sales@cindercone.com
