MIRAKL
INTEGRATION PACKAGE

SAP Business One

MAGMA

MIRAKL

Connecting Shopify with SAP Business One (B1) is now even easier with the latest integration package from Cindercone. The solution automates seamless data flow between B1 and your store, keeping you up to speed on stock levels and sales in real-time.

Each package includes:

Sales Orders

Despatches

Inventory

INTEGRATE. CONNECT. FLOW

CINDERCONE

MIRAKL
INTEGRATION PACKAGE

What's included in the standard package:

Sales Orders from Mirakl

Sales Orders

New Mirakl orders will be created within B1. These are typically paid on account by the retailer, so no payment is created. We will agree order extraction rules from the Mirakl platform based on the retailer being implemented as requirements vary. Our implementation team will work with you to agree mapping rules around customer and product coding, end client delivery address and contact details, required delivery date, couriers, and price. This is a key integration that saves time and reduces errors, ensuring that subsequent messages are built on a solid foundation.

Despatches to Mirakl

Despatches

Magma will return the courier and tracking reference to the Mirakl platform, along with the despatch confirmation.

Our implementation team will agree the rules for extracting this information from B1 as there are some flexible options, and couriers may change based on product size and weight, plus other factors.

Inventory to Mirakl

Inventory

Magma will send current stock levels to the Mirakl platform from B1. The process is based on an "offer" download from Mirakl. Magma will use the product code in this download to locate the B1 inventory level and push back to Mirakl. Note that it is mandatory to push back the price, so Magma takes this from the download.

Excluded from Package:

- Offer creation and update plus dynamic pricing from SAP B1
- Additional Marketplaces
